

Errata for PhD thesis

“Context-Aware for Collaborative Applications”

Christopher Viana Lima

The following list contains errors found in my PhD thesis.

Chapter 5, p. 71, third paragraph, fifth sentence – The sentence should be rephrased: “Data value as using similar operator does not require any conversion, since the data is already calculated in the precise form, i.e. interests. For binary operators, the data needs to be normalised using a Simple Matching Coefficient.”

Chapter 6, p. 99, first paragraph – The sentence should be rephrased: “Regarding the second stage that comprised the relevance mode, 36% of participants do sometimes felt the framework suggested the appropriate sessions. 64% of participants did not feel appropriate such suggestions.”
